Nancy, one point - in press responses we've been saying that we will update/revise our RA. The fact sheet on the web says it too - "EPA has received the data from Chemours and is using it to update its risk assessment."

Tom,
Thanks again for sharing your slides. I have 2 questions. Jeff- please chime in if you have different thoughts.

This is the presentation I will be giving at the EPA Children's Health Advisory Committee meeting this Thursday. Essentially the ORD briefing provided to the appropriations committee in October + a few slides regarding children's health + an update re North Carolina Chemours spill. All info is public and previously released.
